# Project Overview

Elevating Texas A&M University as a leader in teaching innovation, the new Innovative Learning Classroom Building will propel the next generation of students toward the future. Located at the heart of campus, this signature building defines a new immersive experience blurring the boundaries between teaching and learning, building and site, and tradition and innovation. The building includes 10 technology-rich classrooms in 9 different layouts including arenas for teaching in-the-round, collaborative case studies, and various team-based learning studios. Together the nearly 2,200 instructional seats, supported by a collocated instructional innovation hub, will allow an unprecedented exploration of student-centric learning.

**Project:** Texas A&M University,  
Innovative Learning Classroom Building
